

DPC Community Comms

On the first of July we advised residents via the Davenham Life & Davenham Parish Council Facebook pages and emailed all residents on our distribution list, about the importance of the HS2 petitioning phase.

This update was also added on the DPC web site

As the impacts on our local landscape, ecology, highways, environmental health and community become clearer we have today submitted a list of mitigations to Cheshire West & Chester Council who will include these within their countywide petition

The attached map is an indication of the main areas that will be impacted in and around our parish during the construction phase, which will be anything from 3 to 5 years

The Government Select Committee responsible for HS2 will now listen to any petitions received against HS2. Please find below a link to find out more about the petitioning process on our dedicated HS2 page on our website for individuals /organisations directly impacted by HS2 living and operating from Davenham.

The petitioning period will run until Thursday 4 August 2022.
